IAIA Italia -2009 Activities

New National SEA Guidelines Project

1. Absence of a standard and scientifically based methodology for SEA in Italy
2. Need for rigorous, scientific, advanced and clear tools, which may lead to a shared and effective analysis procedure, to be applied to specific environmental contexts

MAIN GOAL OF THE PROJECT:

To provide a specific practical guidance to SEA practitioners

- Opportunity to introduce
1. STANDARD METODOLOGIES
 2. CERTIFICATION FOR PROFESSIONALS

New National SEA Guidelines Project

Description:

- ✓ jointly run by an **International Panel** of SEA experts and an **Italian Panel** of SEA professionals from national and local authorities.
- ✓ IAIA Italia will encourage a **participatory and transparent process**
- ✓ The project will run for **two years**; during the third year the guidelines will be **tested on specific case studies**. The SEA National Guidelines are expected to be presented officially in September 2011 at a National Conference.

20th November 2009 -Meeting of IAIA Italia Scientific Committee:
*Implementation of New National Guidelines for Strategic
Environmental Assessment (SEA)*

Opportunities for professional certification

New National SEA Guidelines Project

Standard procedures for environmental assessment

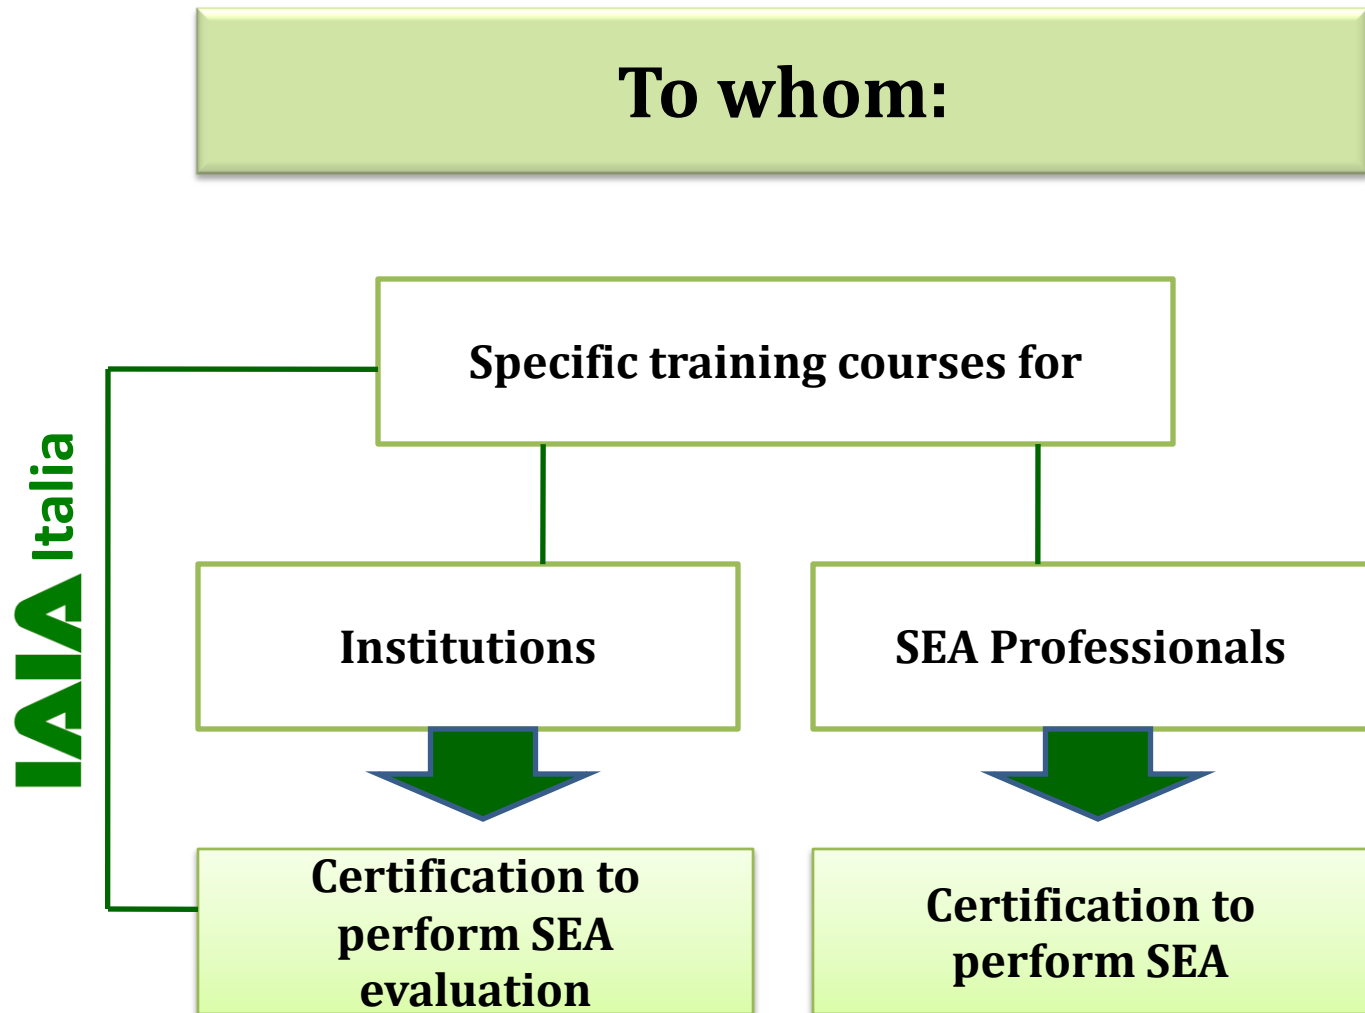

Standard procedures for audit and validation of results

Definition of common and standard products

Guidance to define Monitoring programmes

Opportunities for professional certification
